

Operating table

SU-02

Operating table

SU-02

Purpose

Designed for procedures in the range of general surgery, vascular surgery, cardiosurgery, neurosurgery, urology, proctology, gynaecology, laryngology, ophthalmology, endoscopy, laparoscopy, traumatology, oncology, dentistry, plastic surgery and others.

Full range of specialist equipment is introduced inside "Equipment for operating tables" catalogue.

Standard structure

- The table is constructed of acid proof, stainless steel with mat table surface
- The mobile table base is operated by a foot lever (In the version equipped with base made in shape of T letter locking of the table is done with the use of four extended feet. In the operating table version equipped with base made in shape of H letter here is a central locking system equipped with directional wheel)
- Operating table surfaces are easy to clean and resistant to disinfecting agents
- There is a possibility to change head rest segment with leg rest segment
- Possible use of plate leg rest segment type

Functions and drives

- Table top height adjustment with use of hydraulic foot pump
- Back rest segment angle inclination, leg rest segment (regarding four and five segments table top), head rest segment, Trendelenburg and Reverse Trendelenburg functions are supported by gas springs with blockade
- Kidney elevator (in case of five and six segment table top adjusted manually with use of crank placed at patient's head side)
- Lateral tilts are executed with the use of a crank, located on the side of the table under the seat segment or optionally by a crank located at the patient head side
- In case of a six segments table top leg rest segments are manually adjusted thanks to gear transmission
- Leg rest segments are manually aside adjusted

SU-02 operating table bases

- Operating table SU-02 equipped with base made of T letter shape
- Operating table SU-02 equipped with base made of H letter shape
- Operating table SU-02 without of lateral tilts equipped with base made of H letter shape

Operating table SU-02 equipped with base made of T letter shape

Operating table SU-02 equipped with base made of H letter shape

Operating table SU-02 without of lateral tilts equipped with base made of H letter shape

Standard functions and solutions

Co-operation with C arm

Possibility of exchanging leg rest segments with head rest segment

Table tops SU-02:

Four segments table top with non-divided leg rest:

- total length: 2035 mm
- total width: 550 mm
- leg segment length: 615 mm

Four segments table top with non-divided leg rest

Four segments table top:

- total length: 2035 mm
- total width: 550 mm
- leg segment length: 615 mm

Four segments table top

Five segments table top:

- total length: 2035 mm
- total width: 550 mm
- leg segment length: 615 mm

Five segments table top

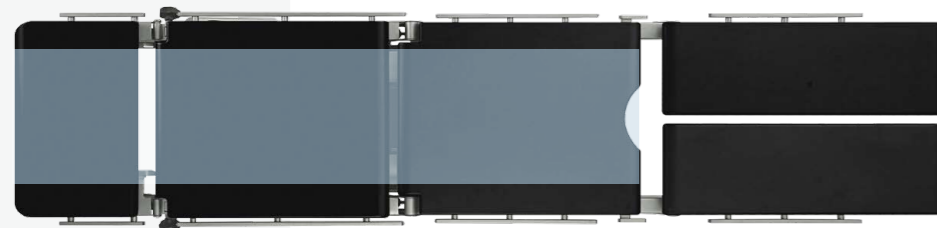

Six segments table top:

- total length: 2160 mm
- total width: 550 mm
- leg segment length: 750 mm

Six segment table top

X-rays permeability

Range of X-ray permeability with use of the RTG tray

Possibility mattresses removal

Trendelenburg and reverse Trendelenburg position

Lateral tilts

Operating table SU-02 equipped with lateral tilts located from patient head side

Operating table SU-02 equipped with plate leg rest segment

Operating table SU-02 without of lateral tilts equipped with base made of H letter shape

SU-02 execution options

- Operating table SU-02 equipped with base made of T letter shape
- Operating table SU-02 equipped with base made of H letter shape
- Operating table SU-02 without of lateral tilts equipped with base made of H letter shape
- Operating table SU-02 equipped with lateral tilts located from patient head side
- Operating table SU-02 equipped with plate leg rest segment

Examples of use

Patient positioning for laparoscopy position (moved aside and lowering down leg rest segments allow for anatomic patient positioning for treatment)

Kidney elevator (in case of five and six segment table top adjusted manually with use of crank placed at patient's head side)

Gynaecology position equipped with gynaecology attachment WS-28.7 and knee crutches WS-05.5

Seating position with use of specialist head rest WS-21.5

Orthopaedic attachment

Orthopaedic attachment made of stainless acid proof steel is fixed for table top. There is possible to carry out together with table top longitudinal and lateral shifts and height adjustment. It's possible patient monitoring by C arm and ensures for surgeon comfortable access for a patient

Technica data

with base
made of T letter
shape

with base
made of H letter
shape

with base made of H
letter shape (without
of lateral tilts)

Total table length equipped with 4 or 5 segment table top	2035 mm	2035 mm	2035 mm
Total table length equipped with 6-segment table top	2160 mm	2160 mm	2160 mm
Total table top width	550 mm	550 mm	550 mm
Mattress width x thickness	500 x 50 mm	500 x 50 mm	500 x 50 mm
Table top height adjustment	725 to 1025 mm	745 to 1045 mm	725 to 1025 mm
Trendelenburg position	30°	30°	30°
Reverse Trendelenburg position	30°	30°	30°
Lateral tilts	±25°	±25°	Lack of
Back rest segment adjustment	-45° to +85°	-45° to +85°	-45° to +85°
Head rest adjustment	-50° to +55°	-50° to +55°	-50° to +55°
Kidney elevator height adjustment (5 and 6 segments table top)	150 mm	150 mm	150 mm
Leg rests Inclination angle adjustment (4 and 5 table top segment)	-90° to +25°	-90° to +25°	-90° to +25°
Leg rests Inclination angle adjustment (6 table top segments)	-90° to +90°	-90° to +90°	-90° to +90°
Leg rest segment Inclination aside angle adjustment	180°	180°	180°
Permissible load (leg rest segment fixed in seat segment / leg rest segment in back rest segment)	200 / 135 kg	200 / 135 kg	200 / 135 kg
Table weight	160 kg	105 kg	105 kg

Operating table functions performed by foot pump

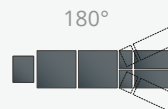

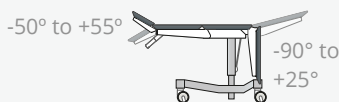

725 to 1025 mm (SU-02 with base made of T and H without of lateral tilts)
745 to 1045 mm (SU-02 with base made of H letter shape)

Operating table functions performed manually

* in 5 or 6-segment table top

** in 6-segment table top

The product meets the requirements of the European Directive MDD 93/42/EEC concerning safety of medical devices
