Core Technology

E10 transplants VINNO core technology RF platform into a slim and compact design concept. Due to the outstanding signal process technology, it delivers clear image quality. Slim body, light weight and small footprint make it ideal for small space and more mobility.

Traditional Ultrasound Platform — Image data processing platform

Innovative RF Ultrasound Platform

RF signal data processing platform for better resolution and definition

- √ Bigger data to compute for better image quality.
- √ Non-linear demodulation to strong signal.
- √ More accurate and higher step calculation.

- √ Processing algorithm based on signal data, not image data.
- √ Flexible algorithm on data processing.
